

Urban furniture information lectern in steel h287_266

Galvanized steel information lectern for urban furniture, 80x120 cm, with display board and transparent polycarbonate sheet, designed for ground mounting.

The urban furniture lectern is an informative support designed to install orientation and communication points in areas of high tourist and cultural interest. It allows for the posting of urban maps, monument descriptions, and itineraries through a **galvanized steel sheet board** protected by a **compact transparent polycarbonate sheet**. The structure is based on a **galvanized steel tubular post**, prepared for ground mounting. The steel surfaces undergo pre-treatment to remove impurities, followed by painting with non-toxic substances according to current regulations.

Technical characteristics

- Material: galvanized steel
- Display board: galvanized steel sheet 20/10 thickness
- Transparent coating: compact polycarbonate
- Display board dimensions: 80 × 60 cm (H)
- Total dimensions: 80 × 120 cm (H)
- Useful reading height: 100 cm
- Anchoring system: ground mounting
- Painting: corten type
- Surface treatment: pre-treatment with non-toxic painting according to current regulations
