

Urban furniture barrier with 2 bases h744_46

Steel and cast iron barrier, 100x108 cm, with decorative crossed arches. Bolt-down fixing, ideal for high-quality urban delimitation.

The **barrier h744_46** is a solution designed to integrate road delimitation safety with the aesthetics of urban decor. It addresses the need to separate pedestrian and vehicular flows in high-value contexts, such as historic squares, school zones, or cycle paths, offering a physically and visually harmonious barrier thanks to the **crossed arches** motif.

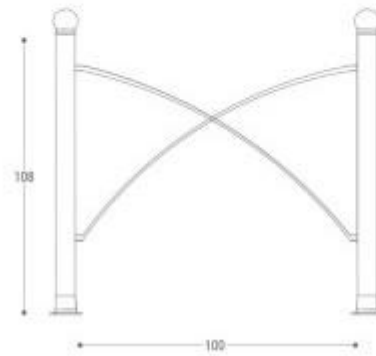

Technical features

- **Vertical structure:** 2 steel posts with a diameter of Ø 60 mm.
- **Ornamental elements:** Decorative cast iron spheres and bases EN GJL 200 (compliant with UNI EN 1561 standard).
- **Central body:** Panel composed of two crossed steel arches for a high visual barrier.
- **Fixing system:** Base plates designed for expansion bolts on existing flooring.
- **Dimensions:** Total width 100 cm, height above ground 108 cm.
- **Treatment:** Galvanized materials resistant to atmospheric corrosion.
