

Urban hygiene trolley h951_03

Manual urban cleaning trolley with storage compartment, tool support and adjustable handle. Dimensions: W 87 x D 71 x H 103 cm.

The **urban hygiene trolley h951_03** has been designed to meet the needs of operators engaged in the cleaning and maintenance of outdoor urban areas. Built for intensive and regular use, this trolley offers **practicality** and **durability**, making it indispensable for those who must move frequently between different work areas. With a **120-liter capacity**, it is perfect for collecting waste and transporting tools without interruption.

The structure includes a **horizontal storage holder**, capable of holding up to **four tools** with handles, ensuring **quick access** and organized workflow. The **vertical handle pocket** allows additional tools to be arranged neatly and safely, optimizing the available space. The **lockable storage compartment** offers reliable protection for valuable tools and materials, while the **open shelf** allows easy access to frequently used items.

The **height-adjustable handle** improves the trolley's ergonomics, adapting to the operator's height for comfortable and effortless use. The trolley is equipped with **two large wheels** with a diameter of **310 mm**, complete with **brakes** to ensure stability and safety during loading and unloading operations, even on uneven terrain.

With a weight of only **18 kg**, this trolley is light enough to be maneuvered easily, yet robust thanks to the high-quality materials used in its construction. It is the ideal choice for those looking for **durable** and **versatile** equipment to improve the efficiency of outdoor cleaning operations.

Don't miss the opportunity to improve your team's efficiency in urban waste management. Purchase the **urban waste trolley h951_03** today and discover how to simplify cleaning and maintenance operations. Contact us for a personalized quote or further details!

Technical features:

- **Dimensions:** W 87 x D 71 x H 103 cm.
- **Weight:** 18 kg.
- **Capacity:** 120 liters.
- **Materials:** Aluminum, galvanized, powder-coated steel
- **Puncture-proof wheels:** ø 310 mm 2 with brake.
- **Storage holder:** Horizontal for four tools.
- **Storage compartment:** Lockable.
- **Open shelf:** For quick access.
- **Handle:** Height-adjustable.
- **Shovels and other accessories** are not included.

User benefits:

- **Quick access** to tools thanks to the organized design.
- Increased **security** with the lockable compartment.
- Optimization of **comfort** with the adjustable handle.
- **Guaranteed stability** provided by wheels with brakes.

FAQ:

1. **How many wheels does the trolley have?**

The trolley is equipped with two wheels with a diameter of 310 mm, complete with brakes.

2. **Is the handle suitable for operators of different heights?**

Yes, it is adjustable to adapt to different statures.

3. **Can the trolley hold multiple tools at the same time?**

Yes, it can support up to four tools with handles.

Mini buying guide:

When choosing an **urban cleaning trolley**, it is important to carefully evaluate the features that make the equipment efficient and durable. The ability to transport tools and waste in an organized and safe manner is a fundamental requirement for ensuring a smooth and productive workflow. A trolley like the **h951_03** model represents an excellent choice for those working in outdoor environments, such as parks, sidewalks, streets, and squares, where robustness and practicality are indispensable. A crucial aspect to consider is the **trolley capacity**, expressed in liters: the larger the capacity, the less frequent the interruptions for emptying, increasing operational efficiency. This model with a **120-liter capacity** offers a good balance between space and maneuverability. Another element to take into consideration is the **adjustable handle**: the possibility of adapting the height of the handle ensures comfortable use for operators of various statures, reducing the risk of fatigue and improving posture during long work sessions. The **puncture-proof wheels** with brakes represent another essential detail. They guarantee good stability and safety, especially when the trolley is parked on inclined or irregular surfaces. The large diameter wheels (310 mm) facilitate movement on uneven ground, such as cobblestones or uneven paving. The presence of a **horizontal storage holder** for tools is a feature that increases practicality, allowing up to four handled tools to be transported and organized. This reduces downtime during work, as everything needed is within reach. The **lockable compartment** adds an extra level of security, allowing valuable items or tools to be stored in a protected way. When choosing an urban cleaning trolley, it is essential to ensure it is made of **resistant materials** such as **aluminum and galvanized steel**, which offer long life and protection from atmospheric agents. A **powder-coated structure** provides a finish resistant to scratches and corrosion, extending the useful life of the trolley. Opting for a trolley that combines **advanced functionality**, lightness, and robustness helps improve the effectiveness of daily operations, reducing operator effort and ensuring a more organized and efficient work environment. This model meets all these needs, making it a reliable choice for professionals in the public cleaning and maintenance sector.

Urban hygiene trolley, manual outdoor trolley, public cleaning equipment, trolley with closed compartment, wheels with brake, tool holder, adjustable handle, lightweight and robust trolley.
