

Urban street furniture bench with backrest in WPC h140_564

Modern 150 cm bench in WPC and galvanized steel. 3-seater structure with integrated armrests, ergonomic backrest and anti-UV composite material slats.

The **urban furniture bench h140_564** is an advanced seating solution, designed to offer maximum durability and comfort in outdoor contexts. The product solves typical criticalities of traditional wood thanks to the use of **WPC (Wood Plastic Composite)** for both the seat and the backrest, ensuring a natural aesthetic combined with the resistance of plastic. The load-bearing structure consists of two supports in **80x6 mm flat iron section**, shaped at the top to form practical armrests. Painted with thermosetting powders in mouse grey or anthracite grey finish, the bench ensures total protection against corrosion and atmospheric agents. The backrest is designed with a 100° inclination to promote a correct and relaxed posture even for prolonged use.

Technical features

- **Dimensions:** 150 x 60 x 84h cm
- **Seat height:** 44 cm
- **Seat and backrest material:** Shaped WPC slats section 90x40 mm
- **Structure material:** Shaped supports in flat iron section 80x6 mm
- **Internal frame:** Galvanized steel prepared for quick assembly
