

Urban street furniture wooden bench h350_82

Wooden and metal benches for public spaces h350_82

Dimensions in cm: L150x D43x H73

This proposed model is ideal for outdoor environments such as parks or public refreshment areas. The structure is made of tubular steel, while the backrest is in wood; the design consisting of metal and wood conveys a sense of relaxation and tranquility that makes the bench perfect for placement near lakes or gardens.

The steel of the supports guarantees durability and strength, being additionally galvanized and oven-painted with natural drying; while the wood is treated with UV-resistant impregnated paints.

Technical features:

- Structure: steel and wood
- Galvanizing and oven painting
- various finishes
- L 150x D 43x H 73 cm
- Seat height: 44 cm

Different finishes are also available on request
