

Urban street planter h990_15

Planter for outdoor space furnishing, in polyethylene with integrated light. Capacity: 56.6 lt. Dimensions: Ø 80 x H 75 cm.

The **luminous planter Ø80 for urban furniture H990_15** is designed to offer a high-impact decorative solution in large public and private spaces. Thanks to its **diameter of 80 cm** and a **capacity of 56.6 liters**, it is ideal for **urban streets, squares, public building entrances, hotels, shopping centers, and large terraces**. It combines the function of a plant container with that of **decorative lighting**, making it a perfect choice for **urban and contract furniture** projects.

During the day, its **modern and clean design** enhances the environment in which it is placed. At night, thanks to the **integrated lighting system**, it becomes a scenic element capable of creating **suggestive and visually coherent atmospheres**, even in large outdoor spaces.

Made of **high-quality polyethylene**, it is resistant to impacts, wear, UV rays, water, and snow. These features make the H990_15 planter particularly suitable for urban environments where **durability and low maintenance** are required. The **internal compartment for the plant has a depth of 40 cm**, providing adequate space for medium and large plants, including shrubs.

The product is equipped with **white light illumination** connected via a **380 cm cable**, which ensures easy installation even in large spaces. It is certified **IP54**, thus protected against dust and water splashes. Available in **various colors** to suit every project.

Choose quality and elegance for your urban spaces. Order the **H990_15 planter** or request a quote for large-scale public and contract supplies.
