

Used battery bin 65 lt h32642

Container with metal base for the collection of used batteries. Capacity 65 liters. Height from the ground approximately 88 cm.

Used battery container ideal for placement outside shops and shopping centers. Made of **plastic material with the rotational technique**; resistant to impacts, aging and discoloration.

The lid is in thermoformed and painted ABS; it is locked to the container by a triangle lock and waste access occurs through holes. Emptying is done using a bag, or through a removable internal container, also made of plastic with the rotational technique. The bin is equipped with a **metal base**.

Technical features:

- Material: plastic with rotational technique
- For outdoor use
- Capacity: 65 liters
- Height from the ground: 88 cm
- Lid dimensions: 47x32 cm
- Depth: 40 cm
- Base dimensions: approximately 48.5x37 cm
- Total weight: 11.5 Kg
