

## Used vegetable oil collection container h1001\_04

Used vegetable oil collection container, 290 lt in LLDPE with filter drainer for frying oils. Dimensions: Ø 82 x H 108 cm.

The **H1001\_04 used vegetable oil collection container** is the professional solution for the correct and compliant management of **used vegetable oils**, coming from frying seed oils, and more rarely from olive oil. It is particularly suitable for activities such as **restaurants, fast-food outlets, industrial kitchens, and canteens**, where the disposal of used oil is a daily necessity.

Made of **high-density linear polyethylene (LLDPE)**, this container guarantees **chemical resistance, structural solidity, and durability over time**. It is equipped with a **built-in filter drainer and bottle drainer**, useful for facilitating the emptying of containers and oil residues in an orderly and clean manner.

The structure consists of **two tanks**: an **internal tank** to hold the used oil and an **external safety tank** that acts as containment in case of leaks, protecting the environment from accidental spills.

The product is completed by a **discharge mouth with a threaded lid**, a **visual level indicator**, and a **leak detection light**, fundamental tools for **constant monitoring of the contents**. The **external black color with a green interior** allows for immediate identification of the specific use for vegetable oils.

It complies with **Legislative Decree 22/1997 (Ronchi Decree)** merged into **Legislative Decree 152/2006**, which regulates the obligation of collection, recovery, and recycling of **exhausted vegetable and animal oils and fats**, making it suitable for use in professional and catering environments.

**Recommended installation:** the container must be **positioned outdoors** on a **flat surface**, even in areas subject to traffic or intensive use.

Make your kitchen compliant with environmental regulations with the **H1001\_04 used vegetable oil container**. Order it now or request a personalized offer for multiple supplies!

### Technical features:

- **Material:** High-density linear polyethylene (LLDPE)
- **Capacity:** 290 liters

## FAQ:

1. **Which oils can this container hold?**  
Used vegetable oils from frying, mainly seed oils and olive oil.
2. **Is it suitable for indoor use?**  
No, installation is intended for outdoor use only, on flat surfaces.
3. **Does it require special maintenance?**  
Periodic cleaning is sufficient. LLDPE material is easy to wash and oil-resistant.
4. **Does the container comply with Italian regulations?**  
Yes, it complies with Legislative Decree 152/2006 and the Ronchi Decree for the management of used vegetable oils.
5. **Can it also be used for animal oils?**  
Yes, it is also suitable for the collection of exhausted animal fats, if coming from catering activities.

## Mini buying guide:

In the catering sector, the correct collection of **used frying oils** is a regulatory obligation as well as an act of environmental responsibility.

The H1001\_04 container is the ideal solution for businesses that generate large volumes of used oil, thanks to the **double safety tank**, the **built-in filter drainer** and the **material resistance**.

Its external installation allows for simple and hygienic management, in compliance with the **Italian law on the disposal of used oils**.
