

## Used vegetable oil container h1001\_05

Used vegetable oil container, 500 lt in LLDPE with integrated filter drainer. Dimensions: Ø 96 x H 124 cm.

The **H1001\_05 used vegetable oil container** is designed for the safe and compliant collection of **waste oils from frying**, used in **restaurants, fast-food outlets, canteens, professional and industrial kitchens**. It is suitable for vegetable seed oils, and more rarely olive oil, generated by food businesses that produce high volumes of oily waste.

Made of **linear high-density polyethylene (LLDPE)**, it is highly resistant to chemicals, impacts, and atmospheric agents. The container consists of **two tanks**: an **internal tank** to hold the waste oil and an **external tank** that acts as a **safety containment**, preventing accidental spills and protecting the environment.

It is equipped with an **integrated filter/bottle drainer**, to facilitate the safe pouring and emptying of oil bottles and containers. The equipment is completed by a **drain mouth with a threaded lid**, a **visual level indicator**, and a **leak warning light**, which allow for immediate visual management of the contents.

The **black exterior and green interior** coloring allows for quick identification of the specific use for vegetable oils. The container complies with **Legislative Decree 22/1997 (Ronchi Decree)**, merged into **Legislative Decree 152/2006**, which provides for the **collection, recovery, and recycling of waste vegetable and animal oils and fats**.

**Recommended installation:** only in **outdoor environments**, on a **flat surface**, near the kitchen or unloading area.

Manage your waste oils responsibly and in compliance with the **500 lt H1001\_05 container**. Contact us now to receive a tailored offer!

### Technical features:

- **Material:** Linear high-density polyethylene (LLDPE)
- **Capacity:** 500 liters
- **Structure:** Double tank (internal + external containment)
- **Integrated accessories:** Filter drainer / bottle drainer
- **Drain:** Mouth with threaded lid
- **Indicators:** Visual level + leak warning light
- **Color:** Black exterior – green interior
- **Dimensions:** Ø 96 x H 124 cm
- **Installation:** Outdoor on a flat surface
- **Regulations:** Complies with Legislative Decree 22/1997 and Legislative Decree 152/2006

- **Safety:** guaranteed by a double tank and leak warning light.
- **Filter drainer:** practical for emptying bottles without dispersion.
- **Indicator:** visual for immediate level control.
- **Material:** resistant, washable, suitable for outdoor environments.

#### FAQ:

1. **Which oils can this model contain?**

Waste vegetable oils from frying, mainly seed oils, and partially olive oil.

2. **Can it be installed indoors?**

No, it is designed for exclusively outdoor installation on a flat surface.

3. **Does it comply with Italian environmental regulations?**

Yes, it respects Legislative Decree 22/1997 (Ronchi Decree) and Legislative Decree 152/2006.

4. **Is the lid watertight?**

The threaded lid guarantees a secure closure against spills and odors.

5. **Is it also suitable for oils derived from catering activities?**

Yes, it can contain oils derived from catering activities.

#### Buying mini-guide:

For professional kitchens and catering businesses that manage significant quantities of used oil, it is essential to use **compliant, resistant, and safe containers**.

The **500-liter H1001\_05** model, with its **double containment tank, built-in filter drainer, and visual level control**, guarantees **operational efficiency and regulatory compliance**.

Outdoor installation allows for simple, hygienic, and centralized management of oily waste, contributing to the sustainability of the business.
