

## Used vegetable oil container h1001\_06

Used vegetable oil container, 1100 l with filter drainer and double tank. Dimensions: Ø 135 x H 127 cm.

The **used vegetable oil container H1001\_06** is designed for the collection and storage needs of **large quantities of waste frying oil**, typically generated by **catering, fast-food, industrial kitchens, company canteens, and high-production restaurants**. It is designed to contain **vegetable seed oils** and, to a lesser extent, **olive oil**, complying with **Italian environmental regulations**.

Made of **linear high-density polyethylene (LLDPE)**, a material resistant to impacts, chemical agents, and thermal shocks, this container is composed of **two tanks**: an **internal tank** to contain the waste oil and an **external tank** with a **safety containment** function, to prevent accidental spills.

It is equipped with a **built-in filter/bottle drainer**, designed to facilitate the pouring of oils from bottles or containers used in the kitchen, avoiding waste or contamination. Furthermore, it has a **discharge outlet with a threaded cover**, a **visual level indicator** and a **warning light for any leaks**, offering **constant monitoring** and facilitating daily operational management.

Compliant with **Legislative Decree 22/1997 (Ronchi Decree)**, now part of **Legislative Decree 152/2006**, the container ensures the **correct management and recovery of waste vegetable and animal oils and fats**, which is mandatory for activities in the food sector. The **external black color with a green interior** clearly identifies the container's intended use.

**Recommended installation:** only **outdoors**, on a **flat and stable surface**, in a covered or otherwise sheltered area, for greater material durability and safety of use.

Simplify the management of your oily waste with the **1100-liter H1001\_06 container**. Perfect for high-capacity kitchens and catering facilities. Request your quote now!

### Technical features:

- **Material:** Linear high-density polyethylene (LLDPE)
- **Capacity:** 1100 liters
- **Structure:** Double tank (internal containment + external safety)
- **Integrated accessories:** Filter drainer / bottle drainer
- **Discharge:** Outlet with threaded cover
- **Indicators:** Visual level + leak warning light
- **Color:** Black exterior – green interior
- **Dimensions:** Ø 135 x H 127 cm
- **Installation:** Outdoors on a flat surface
- **Regulation:** Compliant with Legislative Decree 22/1997 and Legislative Decree 152/2006

### User benefits:

- **High:** capacity for environments with intensive waste oil production.
- **Maximum:** safety with an external containment tank.
- **Filter drainer:** integrated for easy and clean emptying.
- **Control:** immediate thanks to visual indicators.
- **Compliant:** with environmental protection regulations.

#### FAQ:

- 1. What types of oil can I collect with this container?**  
Waste vegetable frying oils, both seed and olive, and used food fats.
- 2. Can I use it inside the kitchen?**  
No, installation is only intended for outdoor environments, on a flat surface.
- 3. Does it comply with Italian environmental regulations?**  
Yes, it complies with Legislative Decree 22/1997 (Ronchi Decree) and Legislative Decree 152/2006.
- 4. How is the content discharged?**  
Via an outlet with a threaded cover, easy to open and close safely.
- 5. Is it also suitable for facilities with high kitchen flow?**  
Yes, with a capacity of 1100 liters, it is designed for high-volume kitchens and intensive use.

#### Mini buying guide:

The management of **waste vegetable oils** is a regulatory obligation and an environmental responsibility for every facility operating in the catering sector.

The **1100-liter** H1001\_06 container represents an ideal solution for high-production entities.

Thanks to the **double tank, integrated accessories** and **safety indicators**, it guarantees **efficiency, cleanliness and compliance with regulations**. Perfect for simplifying daily work and contributing to sustainable management of oily waste.
