

Utility trolley with platform h746_42

Professional pressed sheet metal trolley with removable handle, 150 kg capacity and reinforced 800x450 mm platform. Ideal for warehouses and workshops.

This **trolley with removable handle** represents an indispensable solution for logistic organization within depots, companies, and production departments. Designed to facilitate the handling of crates, boxes, and heavy packages, the device combines a robust structure with superior versatility of use thanks to the possibility of removing the handle, thus facilitating the storage of the trolley itself or the transport of oversized loads.

The construction uses high-quality **pressed and shaped sheet metal**, integrated with a tubular section with a diameter of 28 mm and a thickness of 1.5 mm to ensure structural stability. The platform, reinforced with a thickness of 15/10, is designed to withstand continuous mechanical stress without deformation.

Technical specifications

- **Type:** Crate trolley with removable handle
- **Structure:** Pressed and shaped sheet metal
- **Platform:** In reinforced sheet metal, 15/10 thickness
- **Sliding system:** 2 fixed wheels and 2 swivel wheels of 80 mm with bushing
- **Maximum capacity:** 150 kg
- **Finish:** Resistant powder coating, RAL 7038 gray color
- **Total dimensions:** 905 (W) x 450 (D) x 140/810 (H) mm
- **Useful platform dimensions:** 800 (W) x 450 (D) mm
- **Handle specifications:** Tubular diameter 28 mm, thickness 1.5 mm
