

Vacuum mattress for rescue h800_01

Vacuum mattress for patient immobilization. Dimensions: 110 x 220 cm.

Vacuum mattress ideal for the recovery of injured persons and mountain rescue. The mattress is composed of **2 PVC sheets** that form a waterproof shell, padded with polystyrene beads. It features a 1/4-turn valve to manage air flow and perfectly mold to the patient. To transport the patient, there are 3 restraint straps made of biocir material and 10 handles. Easy to clean and disinfect.

Technical Features:

- Material: PVC
- 10 handles (4 per side, 1 for the head and 1 for the feet) - 3 straps
- Mattress padded with high-density fire-retardant polystyrene beads
- 1/4-turn valve to manage air flow and perfectly mold to the patient
- Dimensions: 110 x 220 cm
- Pump not included
- **Made in France**
- Device compliant with EN1789 standard
- Device compliant with European regulation (MDR 2017/745/EU)
- Compliant with EN ISO 10993-1 standard
