

Variable height mortuary stretcher h566_08

Mortuary transport stretcher in painted steel and AISI 304 stainless steel, capacity 135 kg, with cover, liquid drain hole and 4 braking wheels. Foldable handles.

The mortuary transport stretcher is a specialized device for healthcare facilities, hospitals and clinics that require the movement and management of bodies in compliance with hygienic-sanitary standards. Designed to ensure operational ease and respect for protocol, the stretcher combines structural strength with high-hygiene materials and ease of sanitization.

Technical features

- **Structure:** painted steel with recessed top in AISI 304 stainless steel
- **Dimensions:** length 207/227 cm (foldable handle configuration), depth 70.5 cm, height 63.5/96 cm
- **Capacity:** 135 kg
- **Dead weight:** approximately 150 kg
- **Support surface:** AISI 304 stainless steel with liquid drain hole and removable collection tray on guides
- **Cover:** AISI 304 stainless steel with handles and ventilation holes
- **Mobility:** 4 braking wheels diameter 20 cm, suitable for any type of flooring
