

Ventilated anti-decubitus mattress h937_06

Ventilated anti-decubitus mattress in polyurethane foam, 195x120x20 cm. Capacity 300 kg, ideal for bariatric care and pressure sore prevention.

The **ventilated anti-decubitus mattress** is a device specifically designed for the prevention of pressure injuries in patients forced into prolonged periods of bed rest. Made of high-quality **polyurethane foam**, this **single-section** support combines mechanical resistance and breathable properties, ensuring effective management of the skin microclimate thanks to its internal shape.
