

Vertical bicycle rack for 2 bicycles h729_30

Vertical steel rack for 2 bicycles, with recycled rubber ring for protection. Overall dimensions: W 26 x D 16 x H 80 cm.

The **vertical bicycle rack for 2 bicycles h729_30** is a compact and effective solution for storing bicycles safely and neatly. Designed to protect vehicles from the possibility of scratches and damage, the design integrates a **recycled rubber ring** on which the bicycles rest. This ring not only protects the bike's paint but also serves as a secure attachment point for cable or U-locks, improving protection against theft.

The structure is made of **Ø 50 mm steel tube**, treated with primer and coated with a weather and corrosion-resistant **anthracite grey painting**. At the base, there is a **4 mm thick flat iron plate** with rubber coatings to improve stability and protect the contact point with the floor.

The fixing system includes an **26 x 16 cm oval plate** with 4 **Ø 11 mm** fixing holes, designed for stable ground anchoring. This rack is ideal for public spaces such as car parks, schools, offices, or residential complexes, thanks to its compact dimensions and capacity for **2 bicycles**.

Protect and organize bicycles in a simple and secure way with our **vertical bicycle rack h729_30**! Compact, resistant, and elegant, it is perfect for any type of public or private space. Order now and guarantee practical and reliable support for your users.

- **Bike protection:** The rubber ring protects the paint from scratches and damage.
- **Security:** Compatible with cable or U-locks for secure fastening.
- **Compactness:** Vertical design ideal for tight spaces.
- **Durability:** Weather-resistant materials, perfect for outdoor use.
- **Ease of installation:** Plate with predefined holes for stable and secure fixing.

FAQ:

1. **How many bicycles can it hold?**

The rack is designed to hold **2 bicycles**.

2. **Is the bicycle rack weather-resistant?**

Yes, thanks to the anthracite grey coating and protective primer, it is resistant to rust and atmospheric agents.

3. **How are the bicycles secured?**

Bicycles rest against the rubber ring and can be secured with cable or U-locks (not included).

4. **How is the bicycle rack installed?**

It must be fixed to the ground using the base plate with **4 Ø 11 mm holes**; fixing requires anchors or screws suitable for the type of flooring.

5. **Is it suitable for electric bicycles?**

Yes, it is compatible with electric bicycles as long as the frame can be secured via a cable or U-lock.

Mini purchase guide:

If you need a compact yet functional rack, the **vertical bicycle rack for 2 bicycles** h729_30 is an ideal solution for private or public spaces. Thanks to the **recycled rubber protection**, it ensures that bicycles remain intact without scratches or damage, even with heavy daily use.

It is important to consider the available space: with dimensions of only **26 x 16 x 80 cm**, this rack fits perfectly into narrow entrances, condominium areas, or parking corners. If you are thinking about security, the rubber ring allows for the use of anti-theft devices such as U-locks or cable locks. Furthermore, the resistant materials and anti-rust painting ensure long-lasting durability even in outdoor conditions.

For a stable installation, make sure to fix it to a solid surface, such as concrete or asphalt floors, using anchors and screws compatible with the base plate holes. This rack represents a smart investment for organizing and protecting bicycles in an orderly and safe manner.

Vertical bicycle rack, compact bicycle rack, steel bike parking, rack with rubber protection, outdoor bicycle support, bike rack with anti-theft ring, heavy-duty rack for 2 bicycles.
