

Vertical bike rack h33708

Bike rack in galvanized and painted steel, available with 5 to 9 spaces. Modular structure Made in Italy for urban furniture and apartment buildings.

The **rack-style bike holder** is a technical solution designed for the functional organization of parking areas in public, school, and residential contexts. The structure is conceived to maximize order and safety for cycle storage in outdoor spaces such as parks, urban centers, and apartment courtyards.

The configuration includes **two side uprights in flat steel** that ensure structural stability and allow the alignment of multiple elements in series. The wheel-holder elements, characterized by a specific shape, facilitate tire insertion and offer optimal anchoring points for the use of chains and padlocks, preventing theft. Protection from atmospheric agents is guaranteed by a combined treatment of **cold galvanizing and powder coating**, ensuring a long operational life without the need for frequent maintenance.

Technical features

- **Capacity:** versions available with 5, 7, and 9 bike spaces
- **Dimensions (L x W x H):** 2000 mm (5 spaces), 2550 mm (7 spaces), 3000 mm (9 spaces) x 310 mm x 550 mm
- **Material:** steel with cold galvanizing
- **Finish:** powder coating in anthracite grey
- **Space between wheel holders:** 60 mm
- **Fixing:** pre-arranged for ground anchoring with bolts
- **Production:** Made in Italy
