

Vertical bike rack in galvanized steel h140256

Post-mounted bike rack in iron and galvanized and painted steel to be embedded. Post structure with circular brackets. Dimensions 600x100x1000h mm. Made in Italy

The **post-mounted bicycle rack**, thanks to its compact dimensions, is an excellent space-saving solution. In fact, it can be easily positioned on sidewalks and arranged in rows to increase the number of available spaces.

The structure is composed of a **support post** created by shaping **flat iron** and two circular galvanized steel brackets placed externally next to the post. To ensure adequate stability, anchoring is achieved by extending the post into the ground.

The vertical structure provides greater security for the cyclist as it allows the bicycle frame to be secured with a padlock.

Technical features:

- Dimensions: 600 x 100 x 1000 mm (W x D x h)
- Structure: in iron and galvanized steel
- Finish: bright aluminum
- Fixing: to be embedded in the ground
- Bike spaces: 1-2
- Assembly kit: stainless steel screws and instructions
- **Made in Italy**

INFORMATION

- **warranty** 1 anno
- **Material** Steel
- **strengths** bi-facciali, di design , fisse, ingombro ridotto
- **Typology** al suolo
- **length** 600 mm
- **fixing** da interrare
- **Color** alluminio brillante
- **places** 2
