

Vertical cylindrical PE tank h668_11

Vertical cylindrical panettone tank in recyclable LLDPE. Dimensions: Ø external 1300 x h. 900 mm. Capacity: 1000 lt.

Self-supporting monobloc vertical cylindrical tank for water and food liquid storage made of **non-toxic and 100% recyclable LLDPE**. **UV resistant**, it is designed for **above-ground installation** with direct exposure to sunlight. Equipped with a **lid** with an **external diameter of 320 mm**, male threaded. The **panettone tank** has a **capacity** of approximately **1000 lt**, an **external diameter** of **1300 mm** and a **height** of **900 mm**.

Technical features:

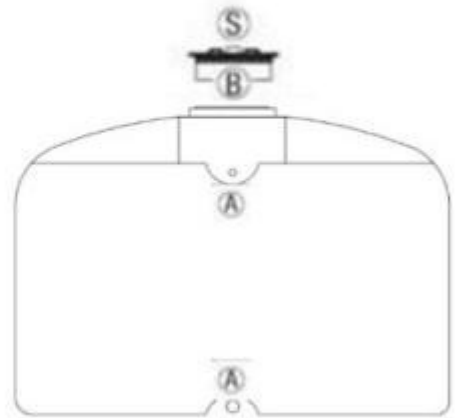

- For storage of drinking water/rainwater/other food liquids
- Shape: cylindrical
- Type: vertical
- Panettone tank
- Material: non-toxic linear polyethylene (LLDPE), UV stabilized and 100% recyclable
- Monobloc structure
- Capacity: 1000 lt
- Resistant to impacts and chemical agents
- Washable
- Male threaded lid
- Dimensions: Ø external 1300 x h. 900 mm
- External lid Ø: 320 mm
- Measurements with overall tolerance $\pm 3\%$ and capacity $\pm 10\%$
- Inlet connections: 1/2"
- Outlet connections: 1"
- Temperature range -20°C $+40^{\circ}\text{C}$
- Liquid storage at atmospheric pressure
- For outdoor use
- Installation on a flat surface suitable for supporting the weight of the tank
- Full positioning on the base and level

INFORMATION

- **Material** polietilene
- **Typology** vertical

A = Attacco
S = Sfiato
B = Boccaporto
