

Vertical steel tree guard h950_16

Vertical tree guard h950_16 in powder-coated steel, ideal for safeguarding and decorating urban green areas. Dimensions: D 59 x h 150 cm. Weight: 27 kg.

The **vertical tree guard h950_16** is an urban furniture element designed to **protect tree trunks** in city contexts and green

spaces, such as parks, squares, and avenues. Made entirely of **high-quality steel**, this guard ensures a solid structure resistant to atmospheric agents and wear. The **powder coating** gives the product an elegant and durable finish, while ensuring effective protection against corrosion and damage caused by bad weather.

With dimensions of **D 59 x h 150 cm** and a **weight of 27 kg**, the vertical guard is designed to offer **stable and secure coverage**, preventing accidental damage to tree trunks and helping to extend the life of the plants. The **robust structure** and careful design make it suitable for high-traffic contexts, where a functional yet aesthetically pleasing element is required.

Choose the **vertical tree guard h950_16** to ensure effective protection for plants and a touch of elegance to your public spaces. **Contact our team** for further information!

Technical features:

- **Material:** 12 x 12 steel square bar
- **Coating:** powder-coated

- **Weight:** 27 kg
- **Type:** vertical

User benefits:

- **Effective protection:** Safeguards tree trunks from impacts and damage.
- **Robustness and resistance:** Made of steel for long life.
- **Refined aesthetics:** Adds a decorative element to green spaces.
- **Low maintenance:** Powder coating that requires minimal intervention.
- **Adaptability:** Ideal for parks, squares, and avenues.

FAQ:

1. **Is the guard weather-resistant?**
Yes, the powder coating ensures effective protection against corrosion and adverse weather conditions.
2. **Is it easy to keep clean?**
Yes, it can be cleaned simply with water and non-aggressive detergents to keep the finish in excellent condition.
3. **Where can this guard be used?**
It is ideal for public spaces such as parks, tree-lined avenues, and squares.
4. **Is the guard suitable for high-traffic areas?**
Certainly, the steel's robustness makes it perfect for areas with high pedestrian traffic.
5. **What is the duration of the coating?**
The powder coating is designed to last a long time, maintaining its appearance and protection even after years of use.

Buying guide:

The **vertical tree guard h950_16** is designed to offer a robust and durable solution for protecting trunks in urban environments and public spaces. Before proceeding with the purchase, it is important to consider the specific characteristics of the area where it will be installed, such as the type of pedestrian traffic and the presence of vehicles. Steel is an ideal material for urban furniture due to its high resistance to impacts and corrosion, ensuring long-term protection without the need for frequent maintenance.

In addition to robustness, the **powder coating** contributes to making the protection aesthetically pleasing, with a resistant finish that preserves the original appearance even after prolonged exposure to atmospheric agents. This type of treatment offers excellent defense against rust and discoloration, maintaining the structure in excellent condition with minimal maintenance effort.

If you are looking for a product that combines **functionality** and **elegance**, the vertical steel tree guard represents an excellent option. It is perfect for parks, squares, and avenues, integrating harmoniously with the surrounding furniture and adding a touch of class to public spaces. Be sure to choose a protection that meets the safety and durability requirements of your specific urban project.
