

Vertical waste baler h980_02

Powerful and compact vertical waste baler, ideal for cardboard and plastic. Thanks to its 3-ton pressing force, it efficiently reduces waste volume. Equipped with a trolley for bale handling. Dimensions: W 97.5 x D 71.5 x H 198.5 cm.

The **vertical baler h980_02** is an **effective and compact solution** for managing company waste. Thanks to its **powerful 3-ton pressing force**, it is perfect for reducing the volume of cardboard and plastic, optimizing space and reducing disposal costs.

Designed to offer **high performance in small spaces**, this baler can be placed **even in environments with limited space**. The **bale ejection is facilitated** by the **included manual trolley**, which allows for safe and fast removal of compacted materials.

The **lower door opening is safe and controlled**, guaranteeing maximum operator protection. The **low noise level (65-68 dB)** makes it perfect for indoor environments without disturbing staff. The **powder coating** ensures **durability and resistance to external agents**. The product comes with oil, 2 test rolls, cable and plug, ejection trolley, user and maintenance manual, and declaration of conformity.

Improve waste management in your company! Buy the **h980_02 vertical baler** now or request a personalized quote!

Technical specifications:

- **Pressing force:** 3 tons
- **Baler dimensions:** W 975 x D 715 x H 1985 mm
- **Loading aperture dimensions:** W 770 x D 460 mm
- **Loading aperture height:** 640 mm
- **Compaction chamber height:** 1000 mm
- **Cylinder stroke:** 550 mm
- **Compacted bale dimensions:** W 770 x D 500 x H 600 mm
- **Cardboard bale weight:** up to 50 kg
- **Plastic bale weight:** up to 70 kg
- **Total machine weight:** 290 kg
- **Compaction cycle duration:** 24 seconds
- **Noise level:** 65-68 dB
- **Motor:** 1.1 kW
- **Power supply:** 1x230V 50Hz 10A
- **Finish:** Powder coating for resistance and durability

User benefits:

- **Effective volumetric reduction:** compacts cardboard and plastic to optimize space and reduce disposal costs.
- **Safety and ease of use:** controlled lower door opening and trolley for bale handling.
- **Compact and versatile:** small footprint, perfect even for companies with limited space.

- **Quiet and high-performing:** low noise level (65-68 dB), ideal for indoor use.
- **Resistant structure:** powder coating for protection against corrosion and wear.

FAQ:

1. Which materials can this baler compact?

The baler is suitable for cardboard, flexible plastic, and paper, but not for wet or hazardous waste.

2. Is it difficult to remove the compacted bale?

No, the baler is equipped with an included manual trolley to easily remove the finished bale.

3. Is a special installation required?

No, the baler works with a single-phase 230V power supply, so it does not require complex industrial systems.

4. How long does a compaction cycle last?

The cycle lasts 24 seconds, ensuring speed and productivity.

5. Is the baler noisy?

No, it has a low noise level (65-68 dB), ideal for indoor work environments.

Mini buying guide:

If your business generates **high volumes of waste** such as **cardboard and plastic**, the **h980_02 vertical baler** is the ideal solution for optimizing waste management. Its **powerful 3-ton compaction force** allows you to **reduce waste by up to 90%**, making storage spaces more efficient and **halving disposal costs**.

The **included manual trolley** makes bale ejection **safe and fast**, while the low noise level allows it to be used in **any work environment** without causing disturbance. Thanks to the **230V single-phase plug**, it can be installed **without the need for specific industrial systems**.

Perfect for companies, warehouses, shops, supermarkets, restaurants, and hotels that want to **reduce waste volume in a simple and safe way**.

Vertical waste baler, cardboard and plastic compactor, company waste volume reduction, single-phase waste baler, industrial waste management, waste compaction machine.
