

Veterinary cage h648_53

Foldable veterinary cage in painted steel, 76x53x59 cm, with two doors and removable plastic support for recovery and transport.

The veterinary recovery cage represents a practical solution for **veterinary clinics** during post-operative surveillance and for the **safe transport of animals** by car. Made of **robust black painted steel wire**, it guarantees durability and ease of sanitization in professional environments where hygiene is a priority. The structure combines containment functionality with practicality of use thanks to a configuration designed to simplify daily operations in the clinic and on the move.
