

Veterinary clinic examination table h938_14

Veterinary examination table in stainless steel with waterproof top and adjustable feet. Dimensions: W 140 x D 60 x H 85 cm.

The **H938_14 veterinary clinic examination table** is an ideal solution for veterinary practices that require robustness, hygiene, and practicality. Its **stainless steel construction** makes it highly resistant to corrosion, ensuring durability even in environments where disinfectants and chemical products are frequently used. The stainless steel material is perfect for hospital settings, where hygiene is a priority, and resistance to atmospheric agents ensures that the table maintains its properties over time.

The upper part is made of **water-resistant phenolic material**, a type of surface that offers impermeability and ease of cleaning. This makes it ideal for environments where liquids and biological products must be managed frequently. The phenolic top does not degrade in contact with liquids, ensuring safe and prolonged use.

The table is completely **disassemblable**, facilitating transport and assembly, making it particularly suitable for clinics that need flexible or easy-to-move furniture. The **feet** guarantee optimal stability even on uneven surfaces, preventing unwanted movement during veterinary procedures.

The dimensions of **140 x 60 cm** provide a work space large enough to perform examinations and treatments on animals of different sizes, while the height of **85 cm** is designed to offer comfort to the operator, reducing physical effort and improving ergonomics during prolonged use.

Choose the **H938_14 veterinary clinic examination table** to guarantee quality, hygiene, and practicality in your practice. With a resistant construction and a functional design, it is perfect for facilitating veterinary examinations and operations. **Buy now** or **request a custom quote** to find the configuration that best suits your needs!

Technical features:

- **Structure material:** Stainless steel
- **Top material:** Water-resistant phenolic
- **Dimensions:** W 140 x D 60 x H 85 cm
- **Feet:** for greater stability
- **Disassemblable product:** Easy to transport and assemble
- **Use:** Examinations and treatments in veterinary clinics and hospitals

User benefits:

- Ease of cleaning and resistance to liquids thanks to the waterproof top
- Robust stainless steel construction for intensive and long-lasting use
- Quick assembly and disassembly for greater flexibility
- Feet to ensure stability on uneven floors
- Large surface area to facilitate veterinary examinations and procedures

FAQ:

1. **Is the table resistant to liquids?**
Yes, the phenolic material top is waterproof and easy to clean, perfect for use in veterinary clinics.
2. **Is it easy to assemble?**
Yes, the table is completely disassemblable and assembly is simple and fast.

3. What are the dimensions of the table?

The table measures 140 cm in length, 60 cm in depth, and 85 cm in height, offering a large and comfortable surface for examinations.

Mini buying guide:

When choosing a **veterinary examination table**, it is important to consider resistance and hygiene, especially in medical contexts. Opting for a table with a **stainless steel structure** ensures durability and ease of sanitization. A **waterproof phenolic top** is essential to ensure that the table resists liquids, facilitating cleaning and preventing deterioration.

If you need flexibility, a **disassemblable** table is the ideal choice, as it allows for easy transport and quick setup. Furthermore, the **feet** ensure stability.
