

Veterinary examination table h938_10

Stainless steel veterinary examination table with water-resistant phenolic top. Dimensions: W 140 x D 60 x h 85 cm.

The **h938_10 stainless steel veterinary examination table** is designed to ensure solidity and practicality during daily animal examination and treatment operations. The **stainless steel** structure makes it extremely resistant and durable, perfect for professional environments such as veterinary clinics or surgeries. Stainless steel is renowned for its anti-corrosive properties and the ease with which it can be sanitized, ensuring a clean and safe environment for four-legged patients.

The top is made of **water-resistant phenolic material**, ideal for withstanding liquids and products used during visits without deteriorating over time. This ensures long life and reduced maintenance. Furthermore, the **detachable design** of the table offers maximum flexibility during transport and installation, allowing for quick and easy assembly.

The table is available with **feet**, to best meet the clinical operational needs. The feet guarantee stability in a fixed position.

Choose the quality and resistance of the **h938_10 stainless steel veterinary examination table**. Thanks to its robust structure and waterproof top, it is ideal for ensuring optimal hygienic conditions during every visit.

Take advantage of the flexibility of the detachable design and customize your table with adjustable feet or wheels. Order now to make your veterinary clinic more efficient or contact us to request more information or a customized quote!
