

Veterinary examination table h938_13

Stainless steel veterinary table with waterproof phenolic top, demountable with feet. Dimensions: L 160 x D 70 x H 85 cm.

The **veterinary examination table H938_13** is designed to offer maximum reliability and practicality in hospital contexts and veterinary clinics. Made with a **stainless steel** structure, the table guarantees resistance to corrosion and long durability, even in environments where hygiene and frequent cleaning are essential. The stainless steel material is ideal for intensive use, as it does not degrade with the prolonged use of detergents or disinfectants, maintaining the integrity and stability of the table over time.

The upper part is made of **water-resistant phenolic material**, which offers a waterproof and easy-to-sanitize surface. This makes the table perfect for environments where liquids, including biological or chemical ones, are a daily occurrence, ensuring quick cleaning and effective prevention against contamination or deterioration.

One of the most important features of the table H938_13 is its **demountable structure**, which allows it to be transported and assembled easily, making it particularly suitable for those who need flexibility in the workspace or for any moves. Furthermore, it is equipped with **feet** that allow the table to be stabilized even on floors that are not perfectly level, offering secure support during examinations and procedures on animals of various sizes.

The generous dimensions of **160 x 70 cm** guarantee a large and comfortable work surface for the operator, while the height of **85 cm** is ergonomically optimized to reduce staff fatigue during prolonged operations. This veterinary table is an excellent choice for ensuring quality, efficiency, and safety in animal treatment.

Optimize your clinic or surgery with the **veterinary examination table H938_13**, designed to offer resistance, practicality, and hygiene. Thanks to its demountable structure and adjustable feet, it is a flexible solution for any need. **Buy now or request a personalized quote** for additional configurations!

Technical features:

- **Structure material:** Stainless steel
- **Top material:** Water-resistant phenolic
- **Dimensions:** L 160 x D 70 x H 85 cm
- **Feet:** To ensure stability on irregular surfaces
- **Demountable product:** Easy to transport and assemble
- **Use:** Hospital contexts and veterinary clinics

User benefits:

- Easy sanitization thanks to the waterproof surface
- Resistant to prolonged use in environments with a high risk of corrosion
- Quick assembly and disassembly for greater flexibility
- Stability thanks to the feet
- Large work surface that improves operational efficiency

FAQ:

1. Is the table easy to assemble?

Yes, the table is completely demountable and can be assembled quickly.

2. How can I clean the table?

The phenolic top is waterproof, so it can be easily cleaned with detergents and disinfectants.

3. Is the table stable on irregular floors?

Yes, thanks to the feet, you can adapt it to surfaces that are not perfectly flat.

4. What are the dimensions of the table?

The table measures 160 cm in length, 70 cm in depth, and 85 cm in height.

Mini buying guide:

If you are looking for a **veterinary examination table**, here are some key features to consider when choosing the right model. Choose a **stainless steel** table to ensure durability and resistance to corrosion, especially in contexts where hygiene and frequent cleaning are essential.

Ensure that the tabletop is made of **water-resistant phenolic material**, to avoid damage caused by liquids and to facilitate cleaning and disinfection after each use. If you need to move the table or change its configuration, opt for a demountable model that allows for easy transport and greater flexibility in organizing spaces. Feet are essential to guarantee the stability of the table on irregular surfaces, ensuring that there are no unwanted movements during procedures.

Consider the dimensions of the table. The **model H938_13**, with a length of 160 cm, offers a large workspace to facilitate the treatment of animals of various sizes, while the height of 85 cm is ergonomically designed to reduce operator fatigue.
