

## Veterinary hospitalization cage h797\_05

Veterinary hospitalization cage in stainless steel, 4 places with removable dividers, equipped with wheels, dimensions 128x70x178 cm. Easy to clean and disinfect.

The veterinary hospitalization cage is an essential equipment in clinical and hospital settings for animals. Designed to ensure a **comfortable, safe and protected** environment during transport and clinic stay, it effectively prevents injuries and unwanted escapes. The structure allows for isolating or grouping animals based on clinical needs, facilitating the management and monitoring of patients.

Built in clinical-grade **stainless steel**, the cage is **extremely easy to clean and disinfect**, a critical element for maintaining high hygiene standards and preventing cross-contamination.
