

Veterinary operating table h930_27

Veterinary table with electric height adjustment. Mattress, IV pole and non-slip mat included. Dimensions: W. 142 x D. 66 x h. 80-116 cm.

The **veterinary operating and therapy table** is designed to ensure practicality and safety during veterinary operations and treatments. Equipped with **electric height adjustment**, it allows for easy adaptation to different operating needs, offering ergonomic and comfortable support. The **structure** is made of sturdy **steel coated with a scratch-resistant and chip-resistant powder paint**, ensuring durability over time and ease of cleaning. The **stainless steel top**, equipped with **two drainage holes**, ensures effective liquid management. On the sides of the top, there are **handles** to facilitate movement, while the **upper rails** allow for the integration of further accessories (not included in the supply) to customize the table according to one's needs. The supply also includes a **mattress, a non-slip mat** for greater stability of the animal and an **IV pole**, making this table a complete and versatile solution for veterinary clinics.

Technical features:

- Dimensions: W. 142 x D. 66 x adjustable h. 80-116 cm
- Support surface dimensions: 135x65 cm
- Work surface dimensions: 129x59 cm
- Maximum load: 150 kg
- Weight: approx. 58 kg
