

Veterinary operating table H930_75

Operating table adjustable in height and inclination. Stainless steel top with drainage holes. Dimensions: W 142 x D 66 x H from 87 to 123 cm.

The **H930_75 operating table** is designed to meet the needs of **veterinary clinics and surgeries**, offering **maximum versatility, hygiene and precision** during surgical procedures or complex clinical procedures. Equipped with **electric adjustment of both height and tilt (Trendelenburg up to 35°)**, it allows for optimal management of the animal's position and an ergonomic working posture for the operator.

The **powder-coated steel structure**, resistant to scratches and impacts, guarantees long life and ease of sanitization. The **stainless steel work surface** is equipped with **two 2 cm drainage holes** to facilitate liquid management. **Under the top**, two **bowls on mounting brackets** provide practical support during procedures. The **long sides** feature **ergonomic handles**, while the **rails at the ends** allow for the integration of compatible accessories to adapt the table to every clinical need.

The table is mounted on **four swivel wheels with brakes** (Ø 7.5 cm) which guarantee smooth movement and stable positioning. The **adjustment is made via manual remote control** included in the standard equipment.

The **standard equipment** includes: 1 **IV pole** with two hooks, 2 **steel bowls**, 1 **padded mattress with resistant cover** and 1 **non-slip mat** interchangeable with the mattress.

With a **load capacity of up to 150 kg** and a structure designed to withstand intensive use, the H930_75 operating table proves to be an **indispensable tool for surgical interventions, therapies and advanced veterinary treatments**.

Choose precision, hygiene and reliability for your clinic: buy the **H930_75 operating table** now or request a quote for dedicated supplies.
