

Veterinary PVC cage 6 places h797_15

6-place PVC veterinary hospitalization cage, with removable dividers, easily sanitizable. Dimensions 1960×735×1800 mm.

Veterinary hospitalization cages are solutions dedicated to the recovery and care of animals in veterinary facilities and clinics. This PVC model guarantees **hygiene and ease of sanitization**, essential factors for preventing contamination and infection during the hospitalization period. The **6-place** capacity with **4 removable dividers** allows the space to be adapted to different clinical needs, isolating or grouping animals according to care protocols and behavioral requirements.
