

## Veterinary radiographic table h930\_97

Veterinary radiographic table with radiotransparent HPL top, sliding drawer, adjustable support for portable RX units and braked wheels.

The **h930\_97 veterinary radiographic table** is designed for performing radiographic examinations on animals in clinics, hospitals and veterinary facilities. It integrates a radiotransparent work surface, a mobile drawer and an adjustable support for portable radiographic equipment, allowing diagnostic operations to be organized in a single station. The dry linear guide system allows for the longitudinal movement of the drawer and the support without the need for lubrication. The 8 mm HPL laminate top offers mechanical, chemical and moisture resistance, while the wheels with brakes allow the table to be moved and stabilized during use. The structure is indicated for veterinary professionals who require a mobile radiographic station, with the possibility of adjusting the position of the equipment relative to the examination surface.

## Technical features

- **Type:** veterinary radiographic table with support for portable RX equipment
- **Table length:** 160 cm
- **Table width:** 70 cm
- **Maximum declared dimensions:** 160 x 65 cm
- **Worktop height:** 80 cm
- **Total support height:** 200 cm
- **Support adjustment relative to the surface:** from 60 to 115 cm
- **Table maximum load capacity:** 150 kg
- **Radiographic support maximum load capacity:** 35 kg
- **Table weight:** 87 kg
- **Surface material:** white radiotransparent X-ray HPL laminate
- **Surface thickness:** 8 mm
- **Surface:** resistant to mechanical damage, chemical and biological agents
- **Top:** waterproof and resistant to moisture and steam
- **Fire reaction of the HPL surface:** class C-s1,d0
- **Integrated mobile drawer:** 60 x 65 x 3 cm
- **Drawer lining:** non-slip mat
- **Drawer and support movement:** longitudinal sliding
- **Guide system:** dry linear guides, without lubrication
- **Sliding surfaces:** high-performance polymers and anti-corrosion materials
- **Guides:** resistant to dirt, water, chemicals, heat and impacts
- **Operation:** silent guides and without routine lubrication maintenance
- **Mobility:** wheels with braking system
