

Veterinary radiographic table with drawer h930_98

Veterinary radiographic table with radiolucent HPL top, mobile drawer for RX detector, steel structure and adjustable feet. Capacity: 150 kg.

The **veterinary radiographic table with drawer h930_98** is designed for performing radiographic examinations in the veterinary field. It is equipped with a radiolucent HPL laminate top and an integrated mobile drawer, positioned under the work surface, which allows for the housing of a cassette or a radiographic detector. The steel structure is coated with scratch-resistant and chip-resistant powder paint, while the 8 mm HPL top guarantees mechanical, chemical, and moisture resistance. The drawer slides on dry linear guides, without the need for lubrication, and features a non-slip mat. The adjustable base allows the table to be leveled relative to the support surface. Suitable for veterinary surgeries and clinics, the table allows for the organized positioning of the radiographic detector under the examination top, providing a stable and easily cleanable workstation.

Technical characteristics

- **Type:** veterinary radiographic table with integrated mobile drawer
- **Structure:** steel
- **Structure finish:** scratch-resistant and chip-resistant powder coating
- **Work surface:** white radiolucent HPL laminate panel
- **Top thickness:** 8 mm
- **Length:** 160 cm
- **Width:** 65 cm
- **Maximum dimensions:** 160 x 65 cm
- **Height:** 80 cm, customizable
- **Maximum permissible load:** 150 kg
- **Weight:** 65 kg
- **Drawer:** mobile integrated under the worktop
- **Drawer dimensions:** 60 x 65 x 3 cm
- **Drawer lining:** non-slip mat
- **Drawer function:** housing for cassette or radiographic detector
- **Movement system:** dry-sliding linear guides, without lubrication
- **Sliding surface materials:** high-performance polymers and anti-corrosion materials
- **Guides:** resistant to dirt, water, chemicals, heat, and impact
- **Guides:** maintenance-free lubrication and characterized by silent operation
- **Base:** adjustable for table leveling
- **Top:** HPL resistant to mechanical damage and chemical and biological agents
- **Surface:** easy to clean
- **Top:** waterproof and resistant to moisture and steam
- **Reaction to fire of the HPL top:** class C-s1,d0
