

Veterinary radiology table h930_92

XR-SLIDE 2 steel veterinary radiographic table. X-ray transparent HPL top (160x65 cm). Dry drawer, 150 kg load capacity.

The **XR-SLIDE 2 veterinary radiology table (h930_92)** is a professional diagnostic workstation designed specifically for veterinary clinics and specialist surgeries. This device solves the issues related to animal positioning and the appearance of visual artifacts during radiographic examinations, thanks to the use of an 8 mm HPL laminate worktop totally transparent to X-rays. The powder-coated steel structure ensures operational stability and integrates an innovative mobile drawer for the detector with dry-running linear guides. This technical solution eliminates noise and mechanical jams, ensuring a calm environment for the patient and optimizing medical staff workflows by limiting maintenance needs.

Technical features

- **Model:** XR-SLIDE 2 (h930_92)
- **Structure:** Steel coated with anti-scratch and anti-chip powder paint
- **Work surface:** White HPL laminate plate (8 mm thick), transparent to X-rays
- **Color:** white
- **HPL top properties:** High mechanical strength, strong chemical and biological resistance, waterproof to moisture and steam, flame retardant (class Cs1, d0)
- **Mobile drawer:** Dimensions 60x65x3 cm, equipped with a non-slip mat for the cassette or radiographic detector
- **Drawer guide system:** Grease-free linear guides ("sliding instead of rolling") in high-performance polymers and anti-corrosion materials
- **Sliding system resistance:** Maintenance-free dry operation, insensitive to dirt, water, chemicals, heat or impacts
- **Mobility:** 4 swivel wheels with brakes (diameter 16 cm)
- **Maximum dimensions (Length x Width):** 160 x 65 cm
- **Height:** 80 cm
- **Allowable load:** 150 kg
- **Weight:** 70 kg
- **Customized height:** available on request
