

Veterinary recovery box 8 units h601_26

Recovery cage for cats and small dogs, 8 units, with removable PVC dividers, conductive wheels and communication openings.

The cat recovery cage is a functional piece of furniture designed for veterinary clinics that require recovery spaces dedicated to cats and small dogs. It allows for the management of multiple patients simultaneously with flexible and secure configurations, reducing animal stress thanks to the possibility of controlled separation and limited movement during convalescence.

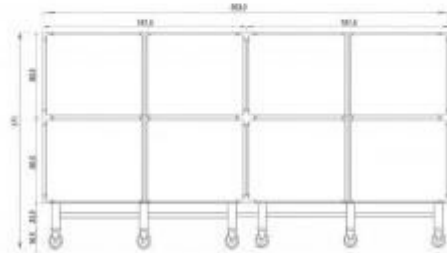

Technical features

- **Number of units:** 8
- **Dividers:** Removable in non-toxic PVC with dedicated guides for quick positioning
- **Configuration:** Lower and upper parts can be used as a single recovery area by removing the dividers
- **Communication openings:** Two open cat passages between adjacent cages (non-closable)
- **Mobility system:** Conductive wheels for electromagnetic staticity, including 4 braking wheels for stabilization
- **Dimensions:** W363 × D72 × H171 cm
