

Veterinary recovery cage 6 units h601_36

PVC recovery cage for animals, 6 units, with conductive wheels and brakes. Dimensions W.121 x D.72 x H.198 cm. Ideal for post-operative recovery of dogs and cats.

The PVC animal recovery cage represents the specialized solution to guarantee dogs and cats that have just been operated on the absolute rest necessary for post-surgical recovery. Structured for small and medium-sized veterinary centers, it offers a capacity of 6 units with easily disinfectable materials, ensuring **resistance and maximum hygiene** in a hospital environment.

The mobility system is characterized by **conductive wheels for electromagnetic staticity**, 2 of which are equipped with brakes, allowing for easy movement of the cage between different rooms while maintaining stability during transfers.

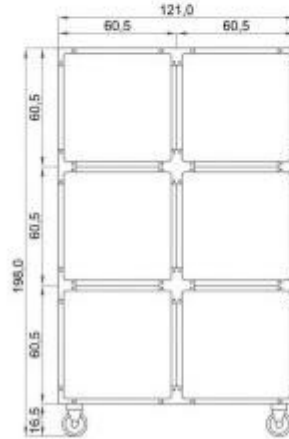

Technical features

- Type: Recovery cage
- Number of units: 6
