

Veterinary recovery cage h797_01

Veterinary recovery cage in stainless steel, 3 slots with removable dividers, for animal transport and medical assistance. Dimensions 127.4 x 70 x 60 cm.

Recovery cage designed for veterinary clinical environments, designed for the transport, accommodation, and care of animals requiring medical assistance. The structure prevents injuries and accidental escapes, keeping animals safe during recovery and hospitalization phases.

The ease of cleaning and disinfection guarantees the **maintenance of the hygienic standards** necessary in medical-veterinary contexts, essential for preventing cross-contamination and nosocomial infections.
