

Veterinary recovery cage h797_02

Veterinary recovery cage in stainless steel, 61.6 x 70 x 60 cm, for a single animal. Easy to clean and disinfect.

The veterinary recovery cage is an essential tool in clinical and animal hospitalization contexts. Designed specifically for the transport, housing, and care of animals requiring medical assistance, it guarantees both the safety of the guest and the operational practicality of the veterinary staff. The structure effectively prevents accidental injuries and unwanted escapes, a critical aspect during sedation phases, post-operative recovery, or pharmacological treatments.

The ease of cleaning and disinfection is a fundamental feature for maintaining hygienic standards and preventing cross-infections in a clinical environment.

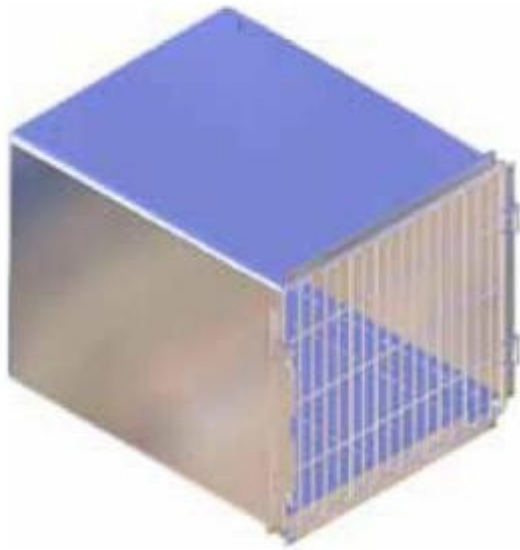

Technical features

- **Material:** stainless steel
- **Capacity:** 1 place (single animal)
- **Dimensions:** width 61.6 cm × depth 70 cm × height 60 cm
- **Construction properties:** practical, comfortable, durable
