- **Wheels:** Removable, equipped with brakes for greater safety
- **Total dimensions:** W 102 x D 57.5 x H 96.6 cm
- **Trolley dimensions:** W 102 x D 57.5 x H 85 cm
- **Stretcher dimensions:** W 102 x D 52.8 x H 11.6 cm
- **Load capacity:** Up to 60 kg

User benefits:

- Easy to clean and maintain
- Optimized mobility thanks to wheels with brakes
- Safety guaranteed by the wheel brake
- Sturdy and lightweight for practical use

FAQ:

1. **What is the maximum weight supported by the stretcher?**
The stretcher has a maximum load capacity of 60 kg.
2. **Are the wheels removable?**
Yes, the wheels are easily removable to facilitate transport and storage.

3. How do you clean the stretcher?

The nylon coating is washable and wear-resistant, making cleaning quick and simple.

4. Are the wheels equipped with brakes?

Yes, all wheels are equipped with brakes to ensure greater stability during use.

Short buying guide:

When choosing a **hospital stretcher**, it is essential to consider some key factors that will influence practicality and safety during daily use. **Lightweight materials**, such as aluminum, are preferable as they offer strength and durability without adding unnecessary weight, making patient transport easier. Another important aspect is the presence of **removable wheels** equipped with brakes, which offer greater control and stability.

It is also essential to evaluate the **dimensions** of the stretcher and the trolley: ensure they are compatible with the spaces of the facility, such as corridors and elevators, to avoid maneuverability problems. Finally, consider the ease of **cleaning and maintenance**, opting for washable coatings that can guarantee optimal hygiene, an essential element in healthcare environments. This **h938_01** stretcher is excellent for every clinical need.
