

Veterinary stretcher with flat top h930_54

Stretcher with hydraulically adjustable height, with braking wheels. Dimensions: W 160 x D 73 x H from 47 to 88 cm.

The **veterinary stretcher H930_54** is a professional and highly functional solution, ideal for **examinations, tests, and pre-operative preparations** in veterinary clinics. Thanks to the **hydraulic height adjustment from 47 to 88 cm**, it allows for maximum ergonomics and comfort for both small and large animals.

In its **lowest position (47 cm)**, it allows even the largest patients to be loaded onto the surface **without effort**, avoiding stress for the animal and the operator. The **160 x 63 cm worktop** is covered in **non-slip, fire-retardant, and liquid-resistant rubberized material**, ideal for environments where hygiene and safety are essential. The **12.5 cm swivel wheels with brakes** allow for smooth movement even over long distances, facilitating transfer between departments or operating rooms.

The **powder-coated steel frame** ensures robustness and durability over time. An **IV pole with two hooks** is also included, which is fundamental during visits and procedures.

Choose the **H930_54 stretcher** to ensure comfort, operational efficiency, and safety in your veterinary clinic. Contact us for personalized offers on multiple supplies.

Technical features:

- **Frame:** Powder-coated steel
- **Worktop:** 160 x 63 cm
- **Surface:** Non-slip, fire-retardant, and liquid-resistant rubberized material
- **Height adjustment:** Hydraulic, from 47 cm to 88 cm
- **Wheels:** 4 swivel Ø 12.5 cm with brake
- **Dimensions:** W 160 x D 73 x H from 47 to 88 cm
- **Weight:** 60 kg
- **Maximum capacity:** 150 kg
- **Included equipment:** Non-slip mat + IV pole with 2 hooks

User benefits:

- **Height:** hydraulically adjustable, ergonomic for staff.
- **Access:** facilitated for large animals thanks to the low position (47 cm).
- **Surface:** non-slip and resistant, ideal for intensive use.
