

Veterinary table with height adjustment h930_72

Electric veterinary table with stainless steel top and wheels with brakes. Dimensions: L 142 x D 66 x H from 87 to 123 cm.

The **H930_72 veterinary table** is designed for **professional use in veterinary clinics and surgeries**, where **safety, hygiene and operational practicality** are required. The table is equipped with **electric height adjustment**, which allows the workstation to be easily adapted to different operational needs and the size of the animal, improving ergonomics for the operator.

The **scratch-resistant and chip-resistant powder-coated steel structure** guarantees robustness and durability over time, even in case of intensive use. The **stainless steel worktop** ensures high hygienic standards and is equipped with **two drainage holes** for effective liquid management during procedures. **Two bowls on mounting brackets** are positioned under the top, useful during examination or treatment operations.

The base is equipped with **four swivel wheels with brakes**, which allow the table to be moved easily and locked securely during use. The **long sides of the top are equipped with handles**, while at the ends there are **rails for additional accessories**, increasing the versatility of the workstation.

The **standard equipment** includes an **IV pole with two hooks**, **two bowls**, a **mattress covered with resistant material** and a **non-slip mat**, which can be used as an alternative to the mattress according to operational needs. A **flat top version** is also available, without drainage holes and bowls: in this case the standard equipment includes the IV pole and a mattress with **fastening straps** for locking under the top.

The table supports a **maximum load of 150 kg**, making it suitable for most veterinary procedures on animals of various sizes.
