

Veterinary table with wheels capacity 150 kg h930_33

Veterinary operating table on wheels. Hydraulic height adjustment. Dimensions: W. 167 x D. 65 x H. 47-88 cm.

The **veterinary operating trolley/table** is designed to ensure a wide range of applications, combining practicality and robustness. With a **minimum height position of only 47 cm**, this table facilitates the positioning of animals, even the largest ones, allowing them to be moved effortlessly onto the work surface. Manoeuvrability is optimised thanks to the **swivel wheels with locking mechanism**, featuring a **diameter of 12.5 cm**, which allow the trolley to be transported over long distances with ease. The **hydraulic levers**, located on both sides of the base, allow the height of the table top to be adjusted up to a maximum of 88 cm, offering flexibility and adaptability during operations. The trolley supports a **load capacity of up to 150 kg**, ensuring safety and stability during use. The **work surface** is made of **304 stainless steel**, equipped with **two drain holes** for easy fluid management. The **powder-coated steel frame** gives the trolley a strong and durable structure. The hydraulic height adjustment is managed via a high-quality **hydraulic actuator**, while an **IV pole**, a **mattress** and a **non-slip mat** for the table top are included, ensuring maximum comfort and safety during veterinary operations.

Technical features:

- Dimensions: W. 167 x D. 65 x H. 47-88 cm
- Top dimensions: 160x65 cm
- Work surface dimensions: 154 x 59 cm
- Maximum capacity: 150 kg
- Weight: 70 kg
- Stainless steel top with 2 drain holes
- Hole diameter: 2 cm
- Powder-coated steel structure
- IV pole 119 cm
- Mattress
- Non-slip mat for table top
- Hydraulic height adjustment via hydraulic actuator
- Wheels with locking system Ø 12.5 cm
