

Veterinary X-ray table h930_95

Veterinary X-ray table in steel with radiolucent HPL top (160x65 cm). Double electric column for height and tilt, 200 kg capacity.

The **h930_95 veterinary X-ray table** is an advanced diagnostic workstation designed for veterinary clinics, animal hospitals, and diagnostic imaging centers. This device solves the complexities associated with the positioning and immobilization of large patients during radiographic examinations. Thanks to the innovative two-column lifting system, it allows for electric adjustment of both height and tilt of the top, allowing the veterinarian to manage heavy animals with minimal physical effort. The solid steel structure integrates perimeter rails for patient anchoring and features a work surface made of completely radiolucent HPL laminate, ensuring artifact-free instrumental investigations in a safe and easily sanitizable clinical environment.

Technical features

- **Structure material:** Steel with scratch-proof and impact-resistant powder coating
- **Work surface:** Standard plate in radiolucent HPL (high-pressure laminate) or alternatively polycarbonate
- **HPL top properties:** Very high resistance to mechanical damage, high chemical and biological resistance, waterproof to moisture and steam, flame retardant (Class Cs1, d0)
- **Lifting system:** Two columns with electric height and tilt adjustment of the top
- **Radiological area:** 87 x 60 cm radiolucent opening positioned under the top, between the columns
- **Restraint systems:** Rails present on all sides for mounting accessories and/or fixing the patient
- **Mobility:** Swivel wheels with integrated brake (diameter 16 cm)
- **Total length:** 167 cm
- **Total width:** 72 cm
- **Maximum top dimensions:** 160 x 65 cm
- **Height:** Adjustable from 63 cm to 105 cm
- **Admissible load:** 200 kg
- **Total weight:** 105 kg
