

Waiting room benches h770_31

Waiting room bench with metallic quartz grey painted steel structure, seats and small table in micaceous black painted steel. Dimensions: 264 x 55 x h 76 cm.

The **modular conference room bench with integrated table h770_31** is a perfect solution for furnishing public spaces, urban infrastructures, and workplaces, such as offices, waiting rooms, meeting rooms, or break areas. Designed with attention to detail, it combines functionality, comfort, and resistance, thanks to the structure entirely made of **epoxy powder-coated steel**. This bench offers the possibility to configure the seats and the table according to the space requirements, maintaining a **modern and versatile design** that adapts to any environment.

The structure of the bench consists of a **steel beam** that supports 4 ergonomic seats and a side table, whose **positioning is flexible**, allowing maximum freedom in layout configuration. The seats are made with a **perforated steel sheet shell**, which not only gives visual lightness but also contributes to the solidity of the structure, thanks to the double folds of the edges that increase thickness at critical points. The metallic **micaceous black** painting of the seats and the table guarantees a resistant and durable finish, capable of withstanding daily wear and tear, while the supports and counterplates are painted in **metallic quartz grey**, giving an elegant contrast to the product.

This bench was designed to be highly **ergonomic**: the perforated seats improve user comfort, ensuring optimal ventilation, especially during long waits. The **integrated table** represents an additional feature particularly useful in waiting spaces, allowing users to place objects or documents while waiting. Made of steel sheet, it is stiffened by triple folds that increase its resistance, ensuring that it is **solid and stable**, even under load.

Another strength of this modular bench is its **resistance to atmospheric agents and corrosion**, thanks to the phosphating treatment that protects all metal elements. This makes it ideal also for outdoor spaces such as **stations, airports, or bus terminals**, where reliability and durability over time are essential requirements. In addition to mechanical resistance, this bench has been designed to comply with the **Minimum Environmental Criteria (CAM)**, guaranteeing an environmentally sustainable product, also suitable for public tenders that require compliance with rigorous environmental regulations.

Ease of **assembly** is a further advantage: each seat is fixed to the beam by 4 M6 screws and bent counterplates, ensuring lasting stability. The fastening system has been designed to be **shockproof and accident-prevention**, minimizing risks for users in crowded environments. The assembly of the bench and the table is simple and quick, making this product an optimal choice also for large-scale projects or for quick installations in public spaces.

In summary, the **modular conference room bench with integrated table** combines **resistance, ergonomics, and versatility**, making it perfect for waiting environments and public spaces of any type. The contemporary design, combined with the robustness of the materials, makes it an ideal solution for those seeking a **high-quality** product that lasts over time and offers comfort and functionality to users.

Choose the **modular bench with table h770_31** to furnish your spaces in a practical and modern way! Request a personalized quote now or order online.

Technical characteristics:

- **Material:** Steel structure with epoxy powder coating.
- **Dimensions:** 264 x 55 x h 76 cm.
- **Integrated table:** Freely positionable on the beam.
- **Resistance:** Anti-corrosion treatment with phosphating.
- **Design:** Ergonomic seats with perforations that guarantee greater solidity.
- **Assembly:** Easy assembly with fastening via M6 screws and "U" bent counterplates.
- **Color:** Seats and table in embossed metallic micaceous black; supports in metallic quartz grey.
- **Safety:** Shockproof and accident-prevention seats.
- **Regulation:** Complies with CAM (Minimum Environmental Criteria).

User benefits:

- **Configurability:** Table and seats freely configurable.
- **Durability:** Materials resistant to corrosion and damage.
- **Versatility:** Suitable for various environments, indoors or outdoors.
- **Easy maintenance:** Simple and quick cleaning thanks to the materials used.
- **Safety:** Designed to be shockproof and accident-prevention.

FAQ:

1. **Is it possible to mount the table in a different position?**
Yes, the table can be mounted in the desired position along the beam.
2. **Is the bench suitable for outdoor environments?**
Yes, thanks to the anti-corrosion treatment, it is resistant to atmospheric agents.
3. **What are the assembly times?**
Assembly is simple and requires little time, thanks to the M6 screw fastening system.
4. **Is it available in other colors?**
At the moment, it is available in micaceous black variants for the seats and metallic quartz grey for the supports.

Mini purchase guide:

When choosing a modular bench for conference rooms or public spaces, consider the configurability of the seats and the addition of accessories such as tables. Opt for resistant materials that are easy to maintain, especially in busy environments. Check compliance with environmental criteria, such as **CAM**, if the product will be installed in public spaces or sustainable projects.
