

## Walking parallel bars h731\_20

Walking parallel bars 2.5 m long with painted steel structure.

**Walking parallel bars** ideal for physiotherapist practices. The **2.5 m long** parallel bar has a painted steel structure and non-slip thermoplastic handrails. All parts are **easily washable**. The structure is foldable and therefore suitable for use in limited spaces as well as allowing adjustment of the mutual distance between the handrails. The parallel bars are height-adjustable with a telescopic system.

### Technical Features:

- Handrail height adjustment system: telescopic
- Handrail height min - max (cm): 80-110
- Load capacity on single handrail (kg): 135
- Dimensions: W. 247 x D. 90 x H. 110 cm
- Weight: 43 kg
- CE marking

## INFORMATION

- Length in millimeters 2500.000000
