

Wall lamp in wrought iron h16821

Wall lamp in wrought iron treated in the galvanizing bath, double glazing with aluminum reflector black / white. Made in Italy

Wall lamp with wrought iron body treated in the galvanizing bath.

Galvanizing is the process by which it is applied a zinc coating on a metal artifact generally of steel to protect it from galvanic corrosion: it in fact limits the formation of micro-electrolytic cells to anodic action in the grain boundaries. Hot dip galvanizing protects steel structures for a time that often exceeds even the life cycle useful structures; cooperates positively to reduce the environmental load over time of a building and is environmentally sustainable; preserving corrosion maintains the design features, collaborating to the overall security of a work; has a low initial cost and comparable other anticorrosive systems; requiring no maintenance for decades, greatly reduces the cost in time of a work.

The diffuser is made of aluminum with double glazing black / white.

Specifications:

- Voltage: 230V 50Hz
- Attack type: E27 26-27mm
- Dimensions: 28cm x 56cm x 25 cm
- Degree of protection: IP23
- Class: 1

Product made in Italy

INFORMATION

- **Height** 28 cm
- **Width** 56 cm
- **Depth** 25 cm
- **Material** wrought iron
- **Typology** wall
