

Wall lamp made of stainless steel and aluminum h16804

Wall lamp made of stainless steel and aluminum with the diffuser in transparent polycarbonate. Product made in Italy.

Wall lamp made of stainless steel and aluminum with the diffuser in transparent polycarbonate.

The stainless steel, thanks to the content of alloying elements (mainly the percentage of chromium), has the possibility of "self-passivation", that is, to become covered with a layer of oxides invisible, of molecular size, which protects the metal below from corrosion.

The diffuser in transparent polycarbonate is extruded polycarbonate and transparent methacrylate, properties of UV resistance and impact resistance.

Also available in white color.

Product made in Italy.

Specifications:

- Voltage 230 V 50 Hz
- Type E27 26-27mm
- Degree of protection IP44
- class 1

INFORMATION

- **Height** 28 cm
- **Width** 48 cm
- **Depth** 30 cm
- **Material** Stainless steel
- **Typology** wall
