

Wall-mounted bin with door and waste disposal hole h982_01

Wall-mounted bin in AISI 304 stainless steel, 700x700x850 mm. Rubberized hole and front door for hygienic waste management in the Horeca sector.

The **h982_01 wall-mounted bin** is a professional module designed for waste management in environments that require rigorous hygiene standards. Made entirely of **AISI 304 18/10 stainless steel**, the structure offers excellent resistance to corrosion and organic vapors typical of industrial kitchens and food laboratories. The integration of a top hole with a rubber ring facilitates quick disposal of waste, keeping the work area clean and tidy.

Technical features

- **Dimensions:** W 700 x D 700 x h 850 mm
- **Material:** AISI 304 18/10 stainless steel
- **Configuration:** top hole with rubber protection ring
- **Accessibility:** front door with hinges for container extraction
- **Support:** 40x40 mm square section stainless steel legs
- **Compatibility:** suitable for bins with a diameter up to 500 mm (50-liter bag capacity)
- **Supply status:** fully assembled product
