

Wall-mounted clog rack for operating room h640_25

16-slot stainless steel wall-mounted clog rack, dimensions 99.5x13x96.5 cm, ideal for hygienic and space-saving organization in operating rooms.

The **h640_25 clog rack** is a professional module specifically designed for setting up operating rooms, filter zones, and sterile areas in hospital and clinical environments. Thanks to its configuration for wall mounting, it allows for the tidy organization of up to **16 pairs of surgical clogs**, optimizing staff flow management and ensuring compliance with hygiene protocols. The structure is made entirely of **stainless steel**, the material of choice for healthcare environments due to its resistance to frequent sanitization cycles, while the open design facilitates the natural ventilation of footwear, preventing moisture stagnation.

Technical characteristics

- **Material:** high-resistance stainless steel
- **Capacity:** 16 pairs of clogs
- **Installation:** wall-mounting pre-arrangement
- **Dimensions:** W 99.5 x D 13 x H 96.5 cm
- **Design:** compact and ventilated structure
