

Wall-mounted clog rack for operating rooms h640_24

Wall-mounted stainless steel clog rack for 24 pairs. Vertical space-saving solution for operating rooms and high-hygiene environments.

The **h640_24 clog rack** is a logistical device designed specifically for the organization of operating blocks and sterile environments. The structure allows for the orderly storage of medical staff footwear, while ensuring maximum space optimization thanks to its vertical development and wall mounting. The use of **stainless steel** ensures full compatibility with strict hospital sanitization protocols, resisting chemical agents and preventing bacterial proliferation.

Technical features

- **Dimensions:** W.75.5 x D.13 x h.218 cm
- **Material:** Professional AISI stainless steel
- **Capacity:** 24 pairs of clogs
- **Installation type:** Wall mounting
- **Structure:** Ultra-slim frame for reduced bulk in corridors
