

Wall-mounted examination couch h528_10

Wall-mounted examination couch. with headrest on the right. Dimensions: L.1990xD.650 mm

The wall-mounted examination and massage couch is quick and easy to install and intended for use in areas where a **permanent couch** is not required or where space is limited. This type of couch offers numerous advantages: **extremely short** assembly times, optimal for rapid configuration, **high flexibility**, comfort and safety, **comfortable and optimal** treatment positions. The couch folds down along the wall. In this way, the visible part is the padded tabletop. **The individually folding legs** are equipped with protection against accidental collapse. **The headrest is adjustable** up to + 40° with a locking rod mechanism. Both sections of the top have a **padding thickness of 64 mm**. Reinforced wall brackets are included with the couch. The total length of the table with the brackets is **1990 mm**. In the closed position, the distance from the couch surface to the wall is approximately 190 mm

Technical features:

- Wall-mounted examination couch
- Adjustable headrest up to +40°
- Dimensions: L.1990xD.650xH.700 mm
- Reinforced wall brackets
- Distance from the tabletop to the wall in the closed position approx. 190 mm

*upon request for a quote, it is possible to accessorize the couch and request it in different colors chosen from the attached image. The desired position of the headrest must be requested before ordering.
