

Wall-mounted sanitary napkin dispenser for public bathrooms h224_16

Professional wall-mounted anti-fingerprint stainless steel dispenser for sanitary pads and tampons. High capacity for high-traffic public bathrooms.

The **H224_16 dispenser** is a professional dispenser designed for equipping female restrooms in high-traffic contexts. The **stainless steel** structure with a special **anti-fingerprint coating** combines mechanical strength and ease of cleaning, ensuring a decent appearance even in intensely used environments. This device solves the need to offer an essential courtesy service, improving the comfort of the end user and the image of the facility.
