

Wall-mounted washbasin with electronic tap h982_05

Stainless steel washbasin with 230V electronic tap, two-way mixer and soap dispenser Measurements: W. 400 x D. 400 x h. 173 mm.

The **wall-mounted washbasin h982_05** is designed to ensure **maximum hygiene, water saving and practicality of use** in all professional environments where frequent hand washing is essential. Ideal for **industrial kitchens, food laboratories, pharmaceutical industries, clinics, hospitals and canteens**, this model with an electronic tap eliminates manual contact, helping to maintain high sanitary standards.

Made **entirely of stainless steel**, it ensures **corrosion resistance**, ease of cleaning and long life, even in environments subject to frequent sanitisation. The **compact dimensions (W. 400 x D. 400 x h. 173 mm)** allow installation even in small spaces, making it perfect as a supplementary or main washing point.

The **electronic tap** with integrated sensor activates automatically when hands pass, ensuring **contactless** use. The system is powered at **230V / 1 / 50 Hz**, ensuring continuous and efficient operation.

The washbasin is equipped with a **two-way mixer**, which allows connection to both hot and cold water.

This model also includes a **soap dispenser**, to create a **complete hygiene station** in a single compact and elegant element.

The **washbasin h982_05** is a safe, functional and aesthetically sober choice for all professional realities that place hygiene at the center of their processes.

Protect your work environment with a hygienic and professional solution. **Order the stainless steel washbasin h982_05 now or request a quote for bulk supplies.**

- **Advanced hygiene solution:** ideal for washing stations in high-frequency healthcare and food environments.
- **Hygienic and durable material:** AISI 304 stainless steel structure.
- **Easy installation:** wall mounting even in small spaces.
- **Ease of cleaning:** stainless steel and smooth surfaces for rapid sanitisation.
- **Comfortable use:** two-way mixer for hot and cold water.

FAQ:

1. Does the tap work without touching it?

Yes, it is an electronic tap with a sensor, which activates automatically when hands pass.

2. Can I connect it to both hot and cold water?

Yes, thanks to the two-way mixer you can connect it to both sources.

3. Is the soap dispenser included?

The model includes the soap dispenser.

4. Is it also suitable for installations in tight spaces?

Yes, thanks to its compact dimensions (400 x 400 x 173 mm) it is also ideal for environments with little space available.

5. Does it need a power supply?

Yes, the electronic tap works with a 230V / 1 / 50 Hz connection.

Mini buyer's guide:

When choosing a washbasin for professional use, it is important to consider **hygiene, practicality of use and ease of installation**. The model **h982_05** offers all these features in a compact and resistant format.

The electronic tap with sensor eliminates all contact, reducing the risk of contamination, while the two-way mixer ensures thermal comfort.

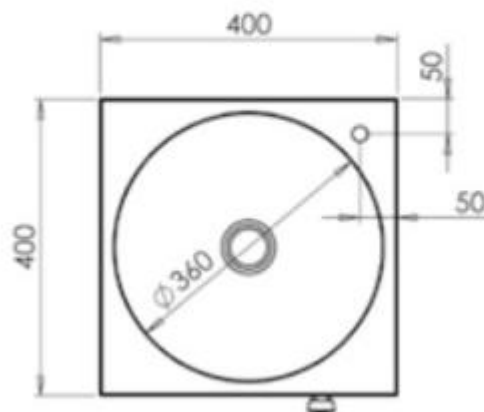

The **AISI 304 stainless steel structure** makes it perfect for food or sanitary environments, where washable and stainless materials are required. The provision for the integrated dispenser allows you to create a complete, modern and compliant washing station.
